## Education

### PES University

Bachelor of Technology in Computer Science & Engineering - CGPA : 8.06

September 2022 - Present

Bengaluru, Karnataka

### Geetanjali Olympiad School

12th CBSE : 86%

June 2020 - July 2022

Bengaluru, Karnataka

### Delhi Public School Bangalore East

10th CBSE : 90%

June 2007 - May 2020

Bengaluru, Karnataka

## Experience

### Centre of Cognitive Computing and Computational Intelligence

June 2025 - August 2025

Summer Research Intern

Bengaluru, Karnataka

- Built a career advisory platform that analyzed 30,000+ job postings & descriptions and 90,000+ courses, identifying skill gaps & recommending relevant skill-sets with a precision of almost 0.98.
- Optimized DSSM(Deep Structured Semantic Model) achieving a training loss of 0.08 & validation loss of 0.04.

## Projects

### AI-Powered Career Skill Gap Analysis & Recommendation | Python, ChromaDB, DSSM, Streamlit

July 2025

- Implemented all-MiniLM-L6-v2 embeddings with DSSM to improve semantic search and skill-course alignment.
- Delivered course recommendations achieving 0.98 precision by matching user skills with job-specific requirements.

### Distributed Systems Cluster Simulator | Python, Docker, REST API, Streamlit, Kubernetes Concepts

May 2025

- Developed a lightweight, simulation-based system that mimics core Kubernetes functionalities like resource allocation & container scheduling.
- Implemented fault tolerance, system recovery, and workload distribution to illustrate distributed computing principles.

### AI-Powered Regulatory Mining Intelligence Bot | Python, Sentence Transformers, MongoDB, Streamlit

April 2025

- Built a legal chatbot using NLP to retrieve and interpret mining laws, compliance rules, and regulations.
- Applied Sentence Transformers for contradiction detection and semantic search across regulatory documents.

### Blockchain-Powered AI Healthcare Insights | Python, IPFS, Multi-Chain Blockchain, Streamlit, Ollama

March 2025

- Linked electronic health records (EHR) stored on IPFS to blockchain IDs to ensure data integrity and traceability.
- Applied OCR and Ollama on patient histories to accelerate clinical decisions, predict drug interactions, and recommend treatments.

### IoT-Enabled Arduino-Based Intruder Detection and Alert System | Arduino, C++, GSM

April 2024

- Engineered a C++ system with ultrasonic sensors to trigger LED, buzzer, and GSM alerts on intrusion detection.
- Achieved <100ms response time with real-time serial communication for rapid security notifications.

### Cloud File Transfer System using UDP | Python, UDP, Socket Programming, SSL, File Handling

March 2024

- Designed a UDP-based client-server system supporting upload, download, file listing, and remote execution for files up to 100MB.
- Implemented multi-client support with parallel commands and IP handling for 5+ concurrent users.

## Technical Skills

**Languages:** Python, R, C, C++, Java, Rust

**AI/ML:** TensorFlow, PyTorch, Scikit-learn, NLTK, SpaCy, Matplotlib, LLM, Seaborn

**Databases:** SQL, MongoDB, ChromaDB

**Tools / Platforms:** GitHub, Docker, Kubernetes, VSCode, Jupyter, Google Colab, Numpy, Pandas, Selenium

**Operating Systems:** Windows, Ubuntu, Linux

## Achievements

**Heal-O-Code Hackathon:** Secured Top 6 out of 50+ teams by building AI based healthcare decision support tool.

**MRD Scholarship:** Awarded the prestigious MRD Scholarship in 1st Semester, receiving a 20% tuition fee reimbursement.

**Distinction Scholarship:** Received the Distinction Scholarship of Rs.2000 for achieving SGPA > 7.75 in Semesters 2-6.

**Hackerrank:** Ranked in the top 30% on Hackerrank college hackathons for Data Analytics and Machine Learning coursework.
